					<div>Rubber feet for better grip with the floor</div> <div>Removable connectors for platform segments</div>  

Check video of the pool platform installation!

Pool platforms are solid and stable platforms that reduce the pool depth and help with learning to swim and practice aqua fitness.

Pool platforms have been designed to help new swimmers learn to swim in deeper water or where visitors are unable to touch the bottom of the pool.

Pool platforms are made especially for swimming schools, commercial pools, spas and hospitals. Pool platforms give confidence and encourage students to learn to swim faster and can increase the use of the pool.
